

# TNRLRNT myriad

(Tuna-roll-or-a-nut)

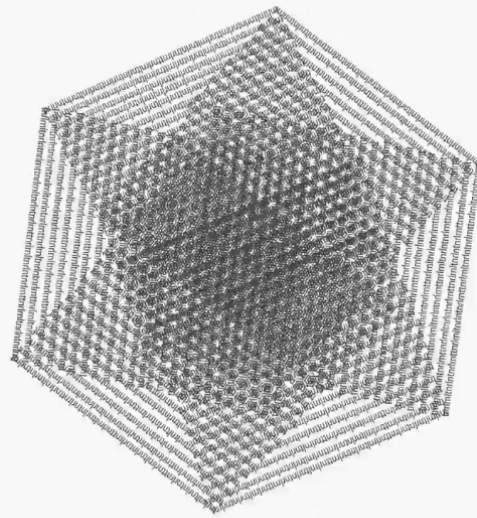

TNRLRNT myriad is an app developed by artist Robertas Narkus in collaboration with Garibaldi Lazer Foundation and Vilnius Institute of 'Pataphysics.

TNRLRNT is a short for the palindrome "Tuna Roll or a Nut". "Tunarolloranut" is a modular, instruction based editions of objects that are created from the perspective of experimental engineering as an attempts to create a hypothetical matter.

Tunarolloranut evolves with time and gains new properties with every new edition/generation mimicking the evolution process. "TNRLRNT myriad" is a 7th edition of "Tunarolloranut".

The launch of application IOS version is to be presented on 20 June at gallerie Juliet Jongma.
